PROFESSIONAL SUMMARY

Detail-oriented and analytical aspiring Data Analyst with a strong academic foundation (8.5 CGPA) and hands-on experience extracting actionable insights from real-world datasets. Proficient in Python, SQL, and Power BI, with demonstrated ability to clean and analyze data, build classification models, and design interactive dashboards. Recently completed 4 end-to-end data projects covering EDA, machine learning, and business intelligence, in addition to a full-stack Django e-commerce application. Seeking to apply analytical and technical skills to solve real-world business problems.

TECHNICAL SKILLS

Programming & Scripting: Python, SQL, C

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI (DAX, Power Query), MS Excel (Pivot Tables, VLOOKUP)

Machine Learning: Logistic Regression, Decision Tree, Random Forest, Scikit-learn, Model Evaluation (Accuracy, Precision, Recall, F1-Score)

Database Management: MySQL, Relational Database Design, Data Normalization, Complex Querying

Web Development: Django, HTML, CSS, Django ORM, REST-style App Design

Tools & Platforms: Jupyter Notebook, Google Colab, Visual Studio Code, Git & GitHub, MySQL Workbench

PROJECT PORTFOLIO

E-Commerce Sales Dashboard — Power BI | *Power BI, DAX, Power Query, Excel*

- Built an interactive Power BI dashboard tracking total sales, profit, profit %, and shipment count across products and salespersons using DAX measures and Power Query transformations.
- Designed KPI cards, treemaps, matrix tables, and monthly trend visuals, comparing current-year vs previous-year performance and shipment distribution.
- Identified the top 6 performing products and salespersons and visualized country-wise sales distribution to support data-driven decisions.

Retail Sales — Exploratory Data Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn*

- Performed end-to-end EDA on 12,575 retail transactions — cleaning data, validating types, and handling missing values to produce a fully analysis-ready dataset.
- Analyzed sales across categories, payment methods, and channels; found Butchers generated the highest total sales (~₹2.18L) and Friday/January were peak sales periods.
- Applied IQR-based outlier detection and correlation analysis to deliver category-specific recommendations for online vs. in-store strategy and targeted discounting.

Healthcare Appointment — Exploratory Data Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn*

- Conducted EDA on healthcare appointment records, engineering time-based features (month, day of week, hour) to uncover scheduling patterns.
- Found cancelled and no-show appointments accounted for 51.5% of all records, with Therapy visits showing the highest no-show rate (35.71%).
- Built doctor-wise and hour-wise comparative analysis using cross-tabulations and heatmaps, translating findings into recommendations to improve scheduling efficiency.

Employee Attrition Prediction — Machine Learning | *Python, Scikit-learn, Pandas, Matplotlib, Seaborn*

- Built and compared 3 classification models (Logistic Regression, Decision Tree, Random Forest) to predict employee attrition on the IBM HR Analytics dataset (1,470 records, 35 features).
- Performed EDA, label encoding, feature selection, and standard scaling as part of a complete preprocessing pipeline.
- Achieved 89.1% accuracy with Logistic Regression, outperforming Decision Tree (77.0%) and Random Forest (86.7%), evaluated via confusion matrix, precision, recall, and F1-score.

INTERNSHIP EXPERIENCE

Data Science Intern — Dhaapps

- Worked with real-world datasets using NumPy and Pandas, applying fundamentals of EDA and machine learning using Python.

Python Web Development Intern — ICT Academy

- Learned Python web development fundamentals and database integration, and built mini web applications.

EDUCATION

Bachelor of Technology — Electronics & Communication Engineering <i>Bonam Venkata Chalamayya Engineering College, Odalarevu CGPA: 8.5</i>	2021 – 2025
Higher Secondary Education (M.P.C) <i>Sri Chaitanya Jr College, Razole Percentage: 87%</i>	2019 – 2021
Secondary Education <i>ZP High School, Katrenipadu CGPA: 9.8</i>	2018 – 2019

CERTIFICATIONS

Programming for Problem Solving using Python (CodeTantra) • Python Web Development Internship (ICT Academy) • Web Technologies & SQL (HQL Edu-tech, APSCHE) • Python Full Stack Development (IIDT Black Bucks, APSCHE)
