PROFESSIONAL SUMMARY

Aspiring Software Engineer with a strong interest in Python development, web technologies, and problem solving. Skilled in Python, Django, SQL, and full-stack web development, with hands-on experience building and deploying a production e-commerce application. Quick learner with strong analytical and teamwork skills, seeking to contribute effectively and grow in a professional software development environment.

TECHNICAL SKILLS

Programming Languages: Python, C, SQL

Web Technologies: Django, Django ORM, HTML, CSS

Databases: MySQL, PostgreSQL, SQLite

Core Concepts: Data Structures & Algorithms, OOP, DBMS, MVT Architecture

Data & ML (working knowledge): Pandas, NumPy, Scikit-learn, Machine Learning fundamentals

Tools & Technologies: Git, GitHub, Visual Studio Code, Jupyter Notebook, MySQL Workbench, Render (Deployment)

PROJECTS

AgriGro — Farm-to-Cart E-Commerce Platform | Python, Django, SQLite, HTML/CSS, Django ORM

- Built a full-stack e-commerce web application from scratch using Django's MVT architecture, implementing user authentication, product catalog, search, and category filtering.
- Designed a relational schema (Category, Product, Cart, CartItem) with One-to-One/ForeignKey relationships, and built a cart with quantity management, Q-object based search, and category filtering.
- Deployed the application live on Render with a custom-styled, framework-free frontend, and managed the codebase using Git and GitHub.

Live Site: agri-gro-django-ecommerce.onrender.com | GitHub: github.com/Satyasai-Adabala/Agri-Gro-Django-Ecommerce

Employee Attrition Prediction — Machine Learning | Python, Scikit-learn, Pandas, Matplotlib, Seaborn

- Developed and evaluated 3 classification models (Logistic Regression, Decision Tree, Random Forest) in Python to predict employee attrition on a 1,470-record HR dataset with 35 features.
- Built a complete ML pipeline — data cleaning, EDA, label encoding, feature selection, and standard scaling — before model training.
- Achieved 89.1% accuracy with Logistic Regression and evaluated all models using confusion matrix, precision, recall, and F1-score.

INTERNSHIP EXPERIENCE

Python Web Development Intern — ICT Academy

- Learned Python web development fundamentals and database integration, and built mini web applications.

Data Science Intern — Dhaapps

- Worked with real-world datasets using NumPy and Pandas for data cleaning, analysis, and visualization.

EDUCATION

Bachelor of Technology — Electronics & Communication Engineering

Bonam Venkata Chalamayya Engineering College, Odalarevu | CGPA: 8.5

2021 – 2025

Higher Secondary Education (M.P.C)

Sri Chaitanya Jr College, Razole | Percentage: 87%

2019 – 2021

Secondary Education

ZP High School, Katrenipadu | CGPA: 9.8

2018 – 2019

CERTIFICATIONS

Programming for Problem Solving using Python (CodeTantra) • Python Web Development Internship (ICT Academy) • Web Technologies & SQL (HQL Edu-tech, APSCHE) • Python Full Stack Development (IITD Black Bucks, APSCHE)
